

COVI-SHOOT

HARDIK JAIN

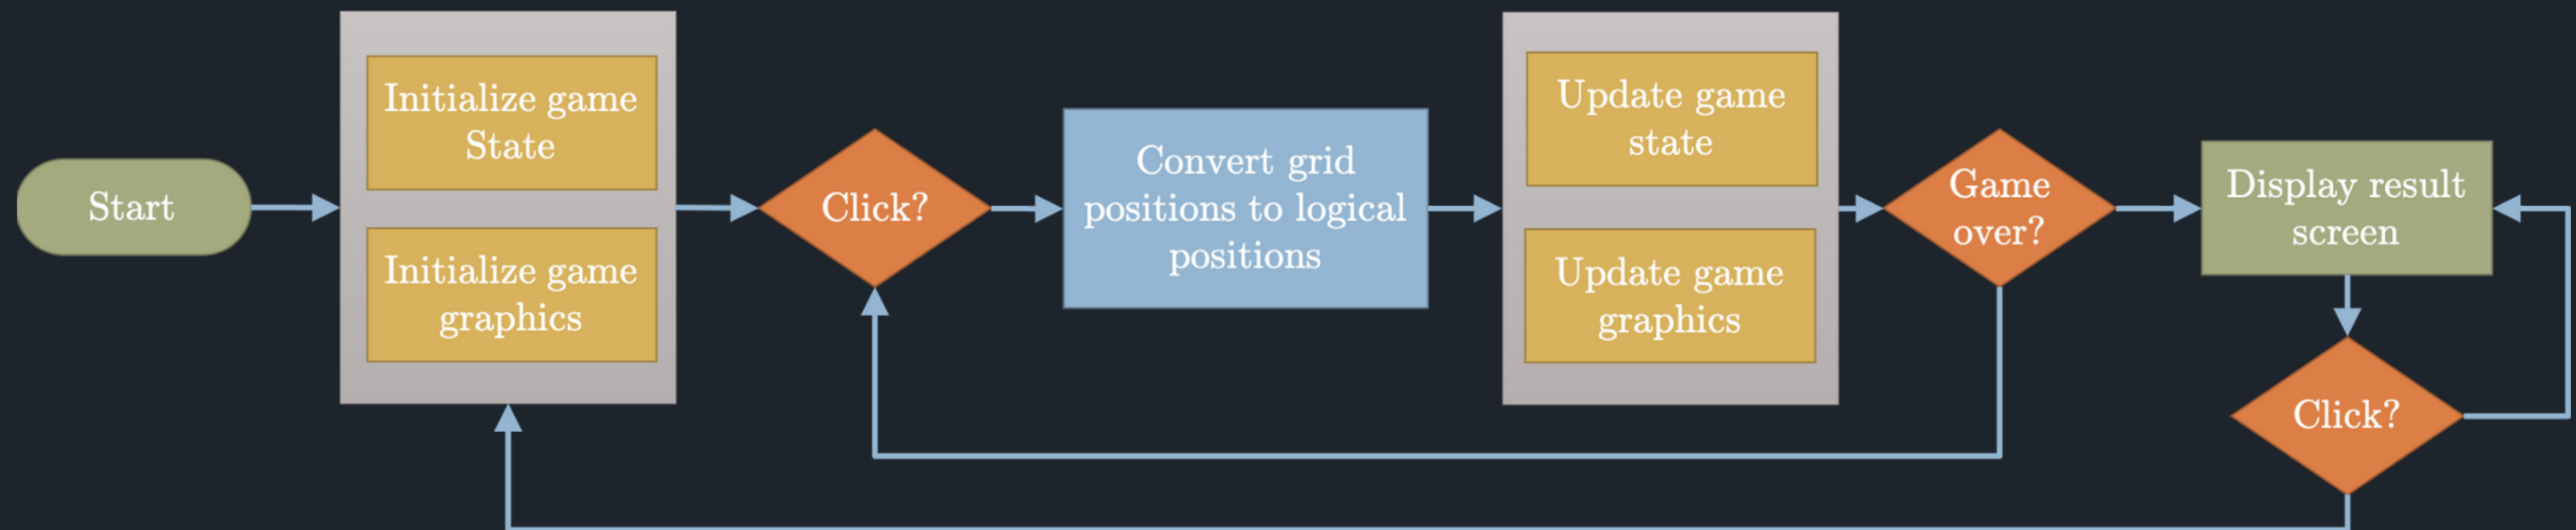

PROBLEM STATEMENT

CREATE AN INTERACTIVE GAME THAT SPREADS AWARENESS ABOUT GETTING VACCINATED. THE GAME MUST BE ABLE TO TRACK THE USER'S SCORE, DISPLAY WHEN THE GAME IS OVER AND CAPTIVATE THE USER BY VARYING THE DIFFICULTY LEVELS

SYSTEM ARCHITECTURE

MAKE A FLOWCHART OF THE EVENTS IN THE ORDER OF
WHICH THE YOUTUBE VIDEO WAS MADE

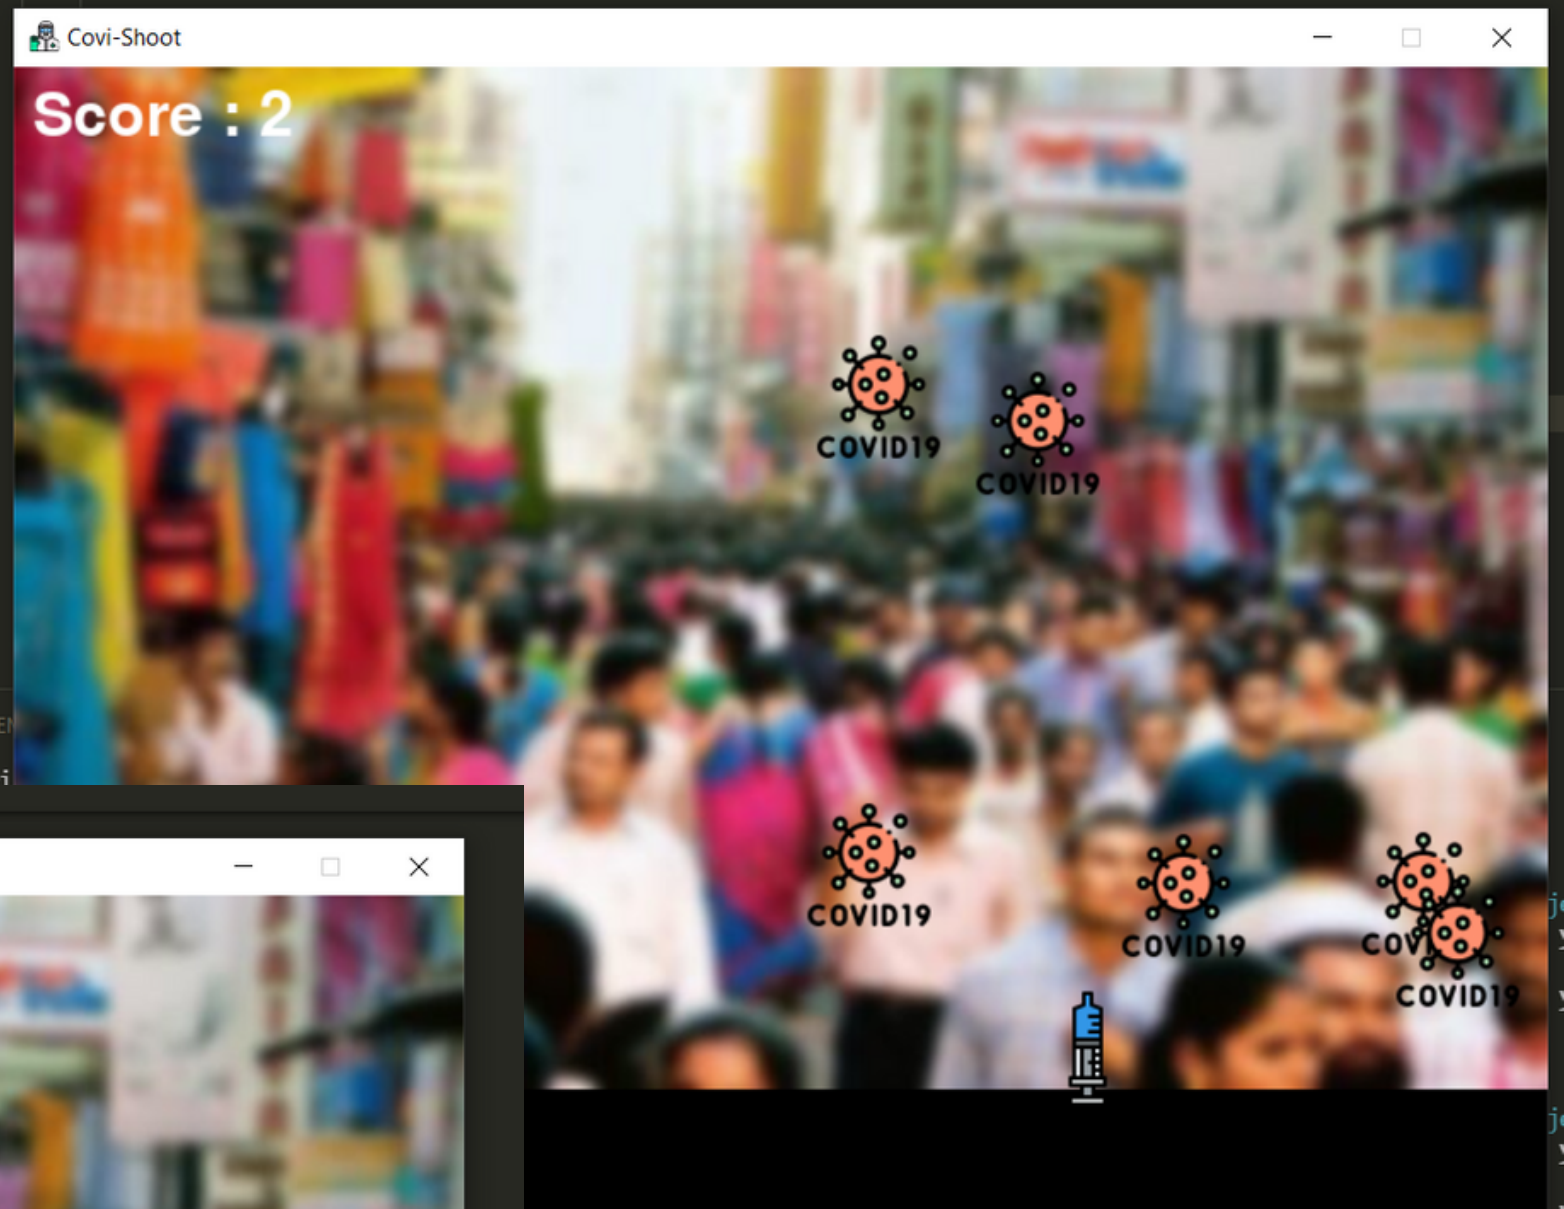

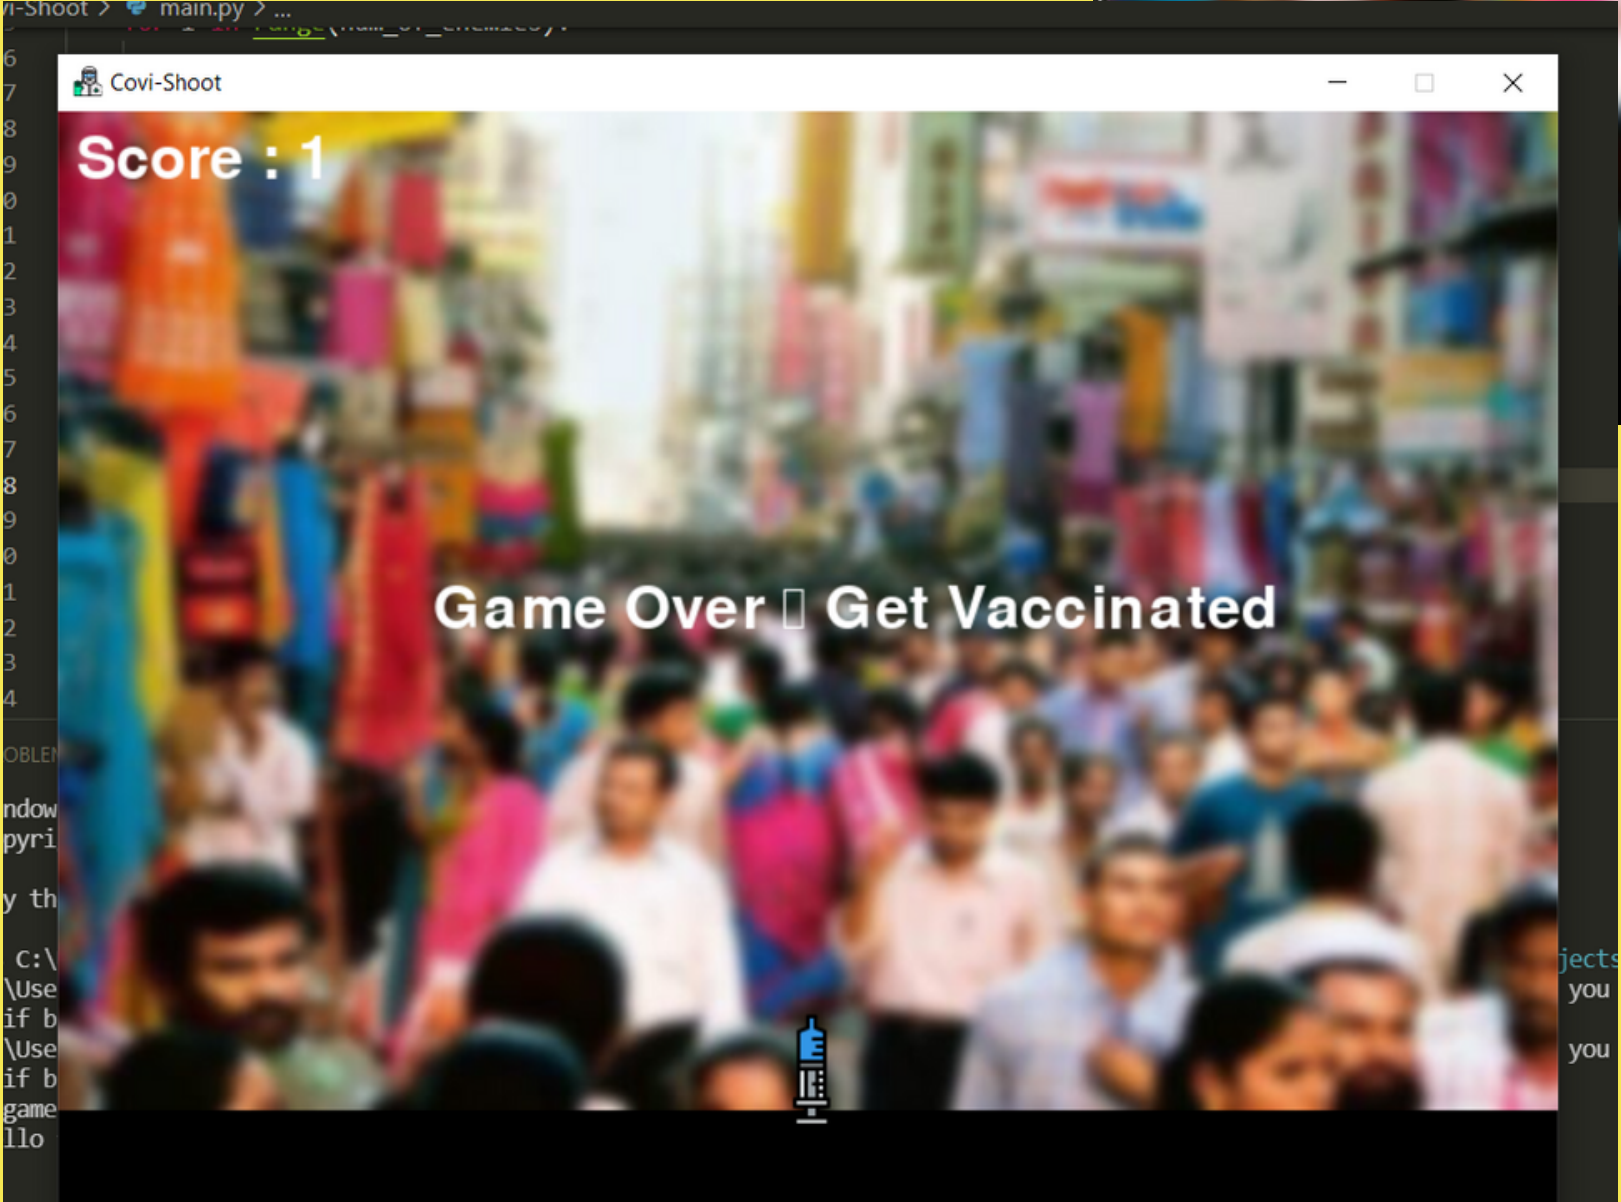

FEATURES OF DESIGNED SYSTEM

- **01**
Game is able tp detect multiple key presses
- **02**
Game gets progressively tougher giving the user an incentive to keep playing
- **03**
Game can simulataneously move multiple enemies and keep track of each individual movement
- **04**
Game can simulataneously move multiple enemies and keep track of each individual movement
- **05**
Game can keep track of the score
- **06**
It spreads awareness

RESULT

CONCLUSION

THIS GAME WAS MADE USING THE APPLICATION OF PYGAME, MATH AND RANDOM MODULE IN PYTHON. THE IDEA WAS TAKEN FROM THE REFERENCE GAME (ATTACHED) AND WE ADDED MULTIPLE FEATURES OF OUR OWN SUCH AS MULTIPLE ENEMIES, SCORE TRACKER, TOUGHER LEVELS AND A POSITIVE MESSAGE THAT SPREADS AWARENESS ABOUT THE PANDEMIC WE ARE FACING TODAY.
